English and the world	Foreign Languages
English Conversation Course	Foreign Languages

授業の改善と工夫

改善と工夫内容
My goal is to create a more tangible and relatable learning experience for students, helping them understand that the world around them is within reach and can be directly applied to their lives. I aim to foster an engaging classroom environment that encourages students to pursue a more fulfilling and dynamic English learning experience. Additionally, I strive to tailor lessons and activities to each student's individual level, ensuring that every student benefits from a personalized and effective ESL experience.
Coming from a multicultural background and understanding the challenges of language adjustment and translation, I aim to use my own life experiences to help students improve their communication skills. My goal is to help students speak more natural English, focusing on effective communication rather than the pressure of perfect grammar or the use of complex vocabulary. I strive to create a welcoming and engaging environment where students feel comfortable and supported, enabling them to advance smoothly and tangibly in their language learning.
