

The advance of artificial intelligence (AI) is making an impact on the society but more profound issues associated with Al are often overlooked and remain unanswered. Will the day when an Al acquires a mind like us come in the near future? What if it starts to feel pain and enjoy pleasure, worry over its uncertain fate? We tackle these fundamental issues from the scientific and philosophical perspectives.

## **Artificial Intelligence Beyond Now:** International Workshop hosted by Department of English and Contemporary Society, SCIS Can Al Be Conscious

Date: January 26th (Sat), 2019
